

Dupont™ Protera™

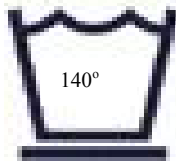

65% Modacrylic, 33% Aramid, 2% Carbon/Nylon Antistatic Fiber

CAUTION READ BEFORE USE

- 1) Flammable Contaminants will reduce the thermal protection of any flame resistant garment. For maximum protection:
 - Wash your new garment before wearing and after each subsequent wearing to thoroughly remove potentially flammable contaminants.
 - Wearing undergarments is recommended with all flame resistant garments.
 - It is the responsibility of the garment user to examine its condition before and after each use to be sure it is suitable for use.
- 2) Anti-static garments of Dupont™ Protera™ should be used in conjunction with proper grounding procedures for maximum protection against the threat of spark. Do not remove garments in a hazardous environment.

GARMENT CARE

- For correct fit, try garment on before washing or wearing.
- Wash new garments before and after each wearing.
- Wash garments of Dupont™ Protera™ separately from other garments.
- Wash light and dark colors separately.
